

San Pila

Email: pilasan19@gmail.com

Tel: 085642182

Address: Chrang Chamres II, Russey Keo, Phnom Penh

Portfolio URL: <https://pila-portfolio.vercel.app/>

Career Objective

Experienced in product management, product development, frontend development, and web applications. Skilled in translating business and user needs into clear product requirements, user stories, acceptance criteria, roadmaps, and prioritized backlogs. Experienced in Agile/Scrum, stakeholder collaboration, product testing, UAT, and continuous product improvement.

Strong hands-on technical experience with Vue.js, Nuxt.js, React.js, JavaScript, TypeScript, API integration, and responsive web application development, enabling effective collaboration between business and engineering teams. Experienced in supporting digital products throughout the full product lifecycle, from requirements and planning through development, testing, deployment, and continuous improvement.

Technical Skill Summary

Frontend: React.js, Vue.js, Nuxt.js, Bootstrap, JavaScript, TypeScript

UI Framework: Element UI, Vuetify, TailwindCSS, MUI

Backend: PHP, Laravel, MySQL, SQL, Node.js, Python

Methodologies: Agile, Scrum

Languages: Khmer, English

Product Skill Summary

- Strategic Thinking and Vision: 70%
- Communication and Collaboration: 70%
- Documentation: 60%
- Research & Analysis: 80%

Work Experience

Product Owner / Frontend Developer

Jun 2022 – Present

Everlast & Apps Dev Co., Ltd

- Developed and maintained responsive, scalable web applications using Vue.js, Nuxt.js, React.js, JavaScript and TypeScript.
- Worked closely with business stakeholders and users to understand requirements, business needs, and product goals.
- Translated business requirements into user stories, acceptance criteria, technical requirements, and development tasks.
- Managed and prioritized product features and development tasks based on business priorities, user needs, and technical feasibility.
- Contributed to product roadmap and feature planning, helping define priorities and delivery timelines.
- Collaborated with developers, designers, QA, and stakeholders throughout the Agile/Scrum development lifecycle.
- Participated in sprint planning, backlog refinement, sprint reviews, and daily team coordination to ensure effective product delivery.
- Conducted user testing, gathered feedback, identified issues, and proposed improvements to enhance functionality and user experience.

- Evaluated technical feasibility, dependencies, risks, and implementation approaches to support product and business decisions.
- Monitored product performance and KPIs to identify opportunities for improvement and support data-driven decisions.
- Coordinated testing, deployment, releases, and post-release improvements from development through production.
- Built reusable frontend components and integrated APIs to deliver reliable, user-friendly, and high-performance web applications.
- Troubleshooting, debugging, and optimized applications to improve performance, stability, usability, and cross-browser compatibility.
- Used Jira for backlog, sprint, task, and project management and GitLab for version control and development collaboration.
- Applied SEO and web performance best practices to improve website visibility, performance, and user experience.

Web DeDeveloper

Jan 2020 – May 2022

iOne Co., Ltd.
