PROFESSIONAL SUMMARY

Experience translating business and user needs into clear product requirements, user stories, acceptance criteria, prioritized backlogs, and delivery plans. Experienced in Agile/Scrum, stakeholder collaboration, UAT, product testing, and continuous product improvement.

Hands-on technical experience with Vue.js, Nuxt.js, React.js, JavaScript, TypeScript, REST API integration, WebSockets, and responsive web application development. Able to bridge business and engineering teams throughout the product lifecycle, from discovery and planning through development, testing, deployment, and improvement.

TECHNICAL & PROFESSIONAL SKILLS

Frontend Development:	Vue.js, Nuxt.js, React.js, JavaScript (ES6+), TypeScript, Bootstrap, TailwindCSS, Element UI, Vuetify, MUI
Backend & Databases:	PHP, Laravel, Node.js, Python, MySQL, SQL Server, REST APIs, WebSockets, Pusher
Methodologies, AI & Tools:	Agile / Scrum, Jira, GitLab, ChatGPT, Copilot, kilo Cdoe, Gemini, Claude, Perplexity, Stich...
Soft Skills:	Problem-Solving, Communication, Cross-Functional Teamwork, Attention to Detail, Adaptability, Time Management, Ownership, Continues Learning
Languages:	Khmer, English

WORK EXPERIENCE

Product Owner / Frontend Developer — Everlast & Apps Dev Co., Ltd

Jun 2022 – Present

Product Owner:

- Collaborated with stakeholders to understand business needs, user priorities, and product goals.
- Translated business requirements into clear user stories, acceptance criteria, prioritized tasks, and actionable requirements for the development team.
- Managed and prioritized the product backlog according to business value, user needs, delivery constraints, and product priorities.
- Supported product roadmap planning, feature definition, sprint planning, and delivery timeline management.
- Coordinated with developers, UI/UX designers, QA, and stakeholders to clarify requirements and deliver product features.
- Used Jira for backlog, sprint, task, and project management and GitLab for version control and development collaboration.
- Supported UAT and product testing, gathered user feedback, and identified opportunities for continuous product improvement.
- Clarified requirements, managed changes during development, and helped resolve delivery issues with the engineering team.
- Tracked development progress, risks, issues, and releases to support timely and successful delivery.

- Monitored product performance and feedback to identify opportunities for improvement.

Frontend Engineering:

- Developed and maintained responsive web applications using Vue.js, Nuxt.js, React.js, JavaScript, and TypeScript.
- Built frontend interfaces for multiple admin-side products based directly on business requirements and operational workflows.
- Translated business requirements into practical layouts, user interfaces, and frontend features, including projects without dedicated UI/UX support.
- Developed reusable UI components and responsive layouts for desktop, tablet, and mobile screen sizes.
- Integrated REST APIs and real-time data using WebSockets and Pusher for interactive web applications.
- Worked directly with stakeholders to understand feedback and adjust features and interfaces based on business needs.
- Troubleshot frontend issues and optimized applications for performance, usability, stability, and cross-browser compatibility.
- Applied SEO and web performance best practices to improve website visibility, performance, and user experience.
- Experienced in integrating third-party tools and services (Firebase, i18n, Hotjar, Google Analytics, payment gateways) to drive product analytics, digital transactions, localization, and user insights.
- Used Git/GitLab for version control and collaborative development.

Web Developer — iOne Co., Ltd.

Jan 2020 – May 2022

Web Developer

- Built, designed, developed, and modified responsive web applications with Laravel, PHP, MySQL, JavaScript, jQuery, Ajax, HTML/CSS3, Bootstrap, and Nuxt.js
- Developed the iOneCards e-commerce platform, integrating REST APIs
- Designed and implemented custom web templates and user interfaces based on business requirements and e-commerce needs, working without a dedicated UI/UX designer.
- Translated business and stakeholder's requirements into practical layouts, user interfaces, and functional frontend features, including projects without dedicated UI/UX resources.
- Analyzed and designed databases to support application requirements and reliable data operations.
- Conducted frontend testing and quality checks independently, identified bugs and errors, and implemented fixes without a dedicated QA team.
- Improved website functionality and user experience through iterative feedback, user testing, and bug resolution.
- Applied SEO and web performance best practices to improve website visibility, performance, and user experience.
- Experienced in integrating third-party tools and services (Firebase, i18n, Hotjar, Google Analytics, payment gateways) to drive product analytics, digital transactions, localization, and user insights.
- Collected user feedback, monitored product performance and KPIs, and continuously improved features based on data and user needs.
- Used GitLab for version control, code quality, and collaboration, and Jira for task tracking, project management, and workflow optimization

Android Developer

- Developed and maintained the iOneCards Android application using Java and Kotlin.
- Designed and implemented application updates and new features based on project requirements.
- Tested Android applications independently, identified bugs and errors, and implemented fixes.
- Troubleshot and debugged Android application issues to improve stability and user experience.
- Worked on Android application development, maintenance, and continuous improvements.

Web Developer — Second Chance Co., Ltd. May 2018 – Dec 2019

- Developed and maintained web applications with ASP.NET MVC, ASP.NET Core, C#, SQL, JavaScript, jQuery, Ajax, and Bootstrap
- Designed and developed custom web templates and user interfaces based on project requirements, working without a dedicated UI/UX designer.
- Implemented blockchain payment transactions using MetaMask and MyEtherWallet
- Created custom web templates to meet project requirements and improve user experience
- Maintained and improved website functionality through iterative feedback and user testing
- Tested web applications, identified bugs and errors, and delivered fixes to improve stability
- Used GitLab for version control, code quality, and collaboration; optimized workflows.
- Maintain and improve website functionality and user experience through iterative feedback and user testing.
- Utilize GitLab for version control and project management, maintaining code quality and collaboration.
- Oversee project deployment to the server, ensuring seamless integration and operation.
- Test and finding out bug / error all web application
- Contributed to blockchain projects, attended an Intel IoT workshop in Malaysia, and interviewed candidates

VR Product Developer — Lastmile Co., Ltd.

Apr 2017 – Apr 2018

- **Immersive Tech:** Spearheaded end-to-end development of 2D/3D applications and Virtual Reality (VR) experiences using Unreal Engine for mobile and desktop platforms.
- **Performance Optimization:** Designed interactive 3D UI/UX environments and optimized application frame-rate through asset compression and performance profiling.

Freelance Application Developer — Norton University Projects

2015 – 2016

- **E-Commerce Web App:** Built a full-featured construction e-commerce exhibition website using ASP.NET MVC, C#, SQL, and Bootstrap.
- **Android Game App:** Designed and developed an Image Puzzle Android Game using Java and Android SDK for school project demonstrations.
