

San Pila

Product Owner

I have more than 8 years of experience in software development, web applications, frontend development, and digital product development. Currently, I work as a Product Owner and Frontend Developer, combining technical expertise with product and business responsibilities.

I have experience working with stakeholders and cross-functional teams to gather and analyze requirements, define product priorities, manage roadmaps and backlogs, plan sprints, and deliver digital products. I work closely with development teams to translate business and user needs into clear and practical solutions.

With my technical background in React.js, Vue.js, Nuxt.js, JavaScript, TypeScript, Node.js, PHP, Laravel, and MySQL, I can communicate effectively with technical teams and understand both business and development perspectives. I am also experienced with Agile/Scrum, Jira, Git, testing, debugging, and deployment.

I am a motivated and adaptable professional who enjoys solving problems, improving products, and creating solutions that deliver value to both users and businesses.
